

MIDI shortcuts template for APC 40

Here you go, a nice overview of the default APC 40 MIDI shortcuts we've made for you. Connect your APC 40 to your computer, enable the controller via the Resolume preferences and you're ready to rock! For those that like to rock slightly more sophisticated: all you need to know about MIDI shortcuts can be found in the MIDI chapter of our manual.

This MIDI template fits perfectly with the Example composition that comes with Resolume. It leaves enough space to adjust it to your project and personal preference.

First Dashboard Dial (Hue) layer 1, 2 and 3
